

Our certifications:

GLOBALG.A.P.

The long-standing, fair and trusting partnerships with our producers are at the heart of our company. Our shared, sustainable success is based on our relationships and the first-class quality of their products.

High quality standards, guaranteed purchase, tailor-made offers and fair prices – this balancing act succeeds because we work collaboratively, reliably and promote continuous improvement.

We see ourselves as an appreciative community of dedicated individuals who act as facilitators and bridge builders for our suppliers and as solution-oriented service providers for our customers.

In a digitized, globalized world, we continue to consciously focus on personal contact and reliable connections based on respect for people and nature.

Experience our consistently good delivery capacity as well as reliable high quality and trade with one of the leading contacts in the organic raw materials world, even outside Europe.

Organic by conviction

Since 1990, we have been developing and designing projects worldwide and trading with conviction in food from certified organic farming.

We firmly believe that quality originates where care is taken in cultivation. Therefore, we rely on cultivation techniques that protect our soils, replenish their nutrients, and preserve their fertility for future generations.

For us, organic means taking a stand:

Through our trade, we assume responsibility and contribute to enabling farming families to convert to organic or expand their product range with organic products.

As our partner, you support us in the success of our mission. For this, we extend our heartfelt thanks.
